

Intro

The new RBOE Website will be a central platform for **administrative staff** and **students**, assisting them across the entire college application lifecycle. By replacing fragmented communication channels like email threads, Excel sheets, and WhatsApp groups, the portal ensures that all critical information, from initial onboarding and document submission to application tracking and visa preparation, is accessible, consistent, and managed in one place. This helps students and admins collaborate and achieve maximum trust and productivity.

Admins:

For admins, the website will greatly improve productivity by facilitating the completion of multiple tasks directly through the specialized admin portal. This includes end-to-end **student management** from onboarding and profile access to a dedicated portal for resolving requests with urgency-based sorting. Features like a **centralized calendar** for tracking all university deadlines, integrated **university research tools**, and streamlined **alumni outreach** capabilities will eliminate manual work and allow admins to focus on providing high-value guidance.

Students:

For students, this website will serve as an invaluable resource, allowing them to easily communicate with **RBOE admins**, create a **university list**, perform detailed **application tracking**, and access a variety of highly useful **static resources**. They can seamlessly track required documents, collaborate on critical essays like SOPs and LORs with version control, and monitor their application statuses in real-time. The platform empowers them with a wealth of curated information, including admin-verified university research and comprehensive guides for every step of the process, from pre-application prep to post-arrival logistics in the US.

Extra:

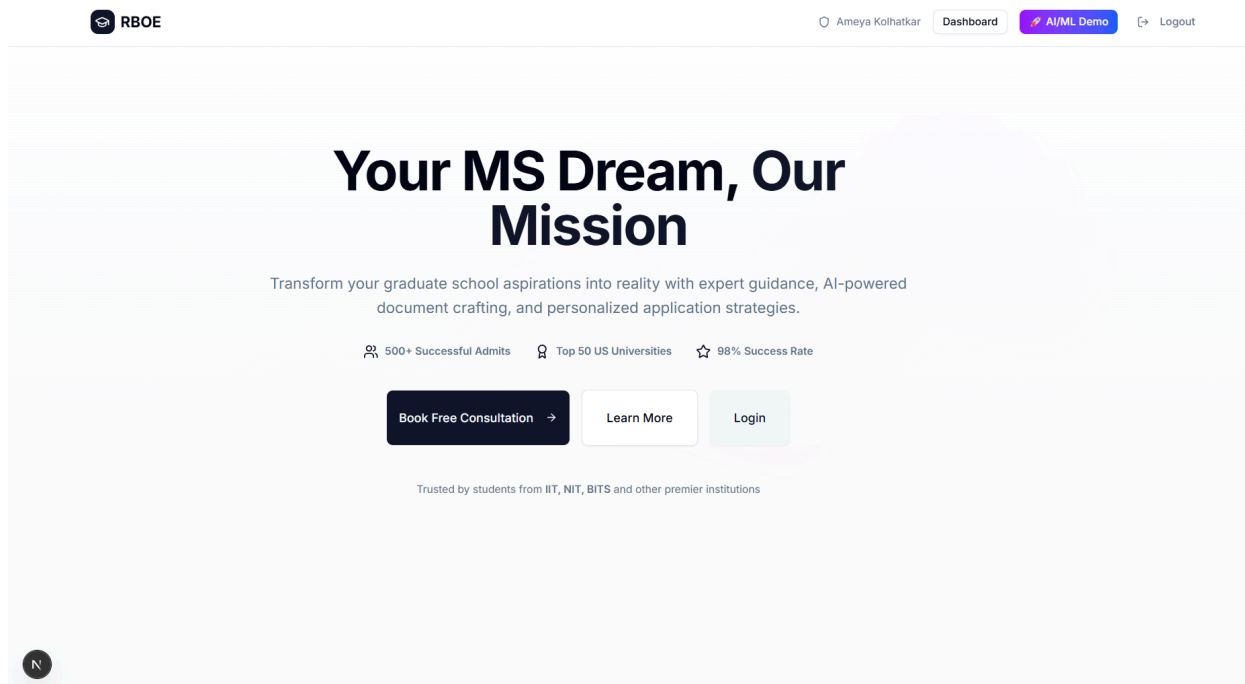

The new website could also contain features to streamline customer operations as well as administrative tasks. It functions as a powerful Customer Relationship Management tool by centralising all student data and communication history. The integration of AI-powered features, such as the **document editor** and the **ML college prediction engine**, will directly assist admins in their primary tasks, reducing turnaround times and improving the quality of service. Finally, the platform will support business growth through integrated modules for **employee management**, like payroll tracking, and customer acquisition tools designed to manage **client referrals** and **sponsorship opportunities**.

Intro:

Brief introduction, catchy tagline, call to action. Buttons to book a consultation or to learn about the provided services

Services

Quick description of provided services, along with a rough timeline or application lifecycle

Comprehensive MS Application Services

From initial consultation to visa approval, we guide you through every step of your graduate school application journey.

SOP & LOR Crafting

Most Popular

AI-powered document creation with personalized storytelling that showcases your unique journey and achievements.

- ✓ AI-Generated Drafts
- ✓ Expert Review
- ✓ Multiple Versions
- ✓ Real-time Collaboration

University Shortlisting

AI-Powered

Data-driven university recommendations based on your profile, preferences, and career goals.

- ✓ Smart Matching
- ✓ Detailed Analytics
- ✓ Deadline Tracking
- ✓ Cost Analysis

Visa Preparation

End-to-End

Complete visa documentation and interview preparation to ensure a smooth transition to your dream university.

- ✓ Document Checklist
- ✓ Mock Interviews
- ✓ Embassy Guidance
- ✓ Timeline Management

How It Works

Our proven 4-step process that has helped 500+ students achieve their MS dreams

1

Profile Building

Comprehensive assessment of your academic and professional background.

2

Document Crafting

AI-assisted creation of SOP, LOR, and other application documents.

3

Application Strategy

Strategic university selection and application timeline management.

4

Visa Success

Complete visa preparation and interview practice sessions.

Testimonials

Feedback from past students, along with their college and current credentials (eg: SDE at Google)

Success Stories from Our Students

Real students, real results. See how RBOE helped them achieve their MS dreams at top universities.

What to Expect

Your consultation will cover:

- ✔️ Personalized profile assessment and university recommendations
- ✔️ Application timeline and strategy planning
- ✔️ SOP and LOR strategy discussion
- ✔️ Visa preparation guidance
- ✔️ Q&A session for all your doubts

Roles

Roles:

Admin

The admin can perform tasks such as student onboarding, student profile management, request management, visa mock interview scheduling, university research, alumni outreach, etc. The admin portal is a central hub to perform all these tasks and monitor incoming notifications

Student

The student portal allows the student to interact with admins, create a university shortlist, track university applications, access various static resources, keep track of college deadlines, and schedule mock interviews.

University Research

Admins can perform university research by aggregating information from various resources like shiksha, usnews, etc. they can then submit a research report about each uni, describing available courses, deadlines, rankings, etc. This can be provided as a resource to the students. The students can also perform their own external research, but the available admin provided data can be trusted as accurate

Visa Mock Interview Scheduling

Once a student finalizes a university and determines the starting date, and HOPEFULLY obtains a visa interview slot, he/she can request a visa mock interview. There can be a dedicated visa interview section on the student and admin portal. The admins can see the dates of all the students as a table, sorted by date and possibly some other factors such as selected university. Then they can schedule mock interviews with rajiv sir. The actual interview will still be held on google meet/ zoom/ etc. but the scheduling of the interview and notifying the students and rajiv sir can be done through the portal

AI Powered Features

AI powered document editor

This editor will help Admins to write the SOP and LOR, and provide a clean UI with access to the student's details and other provided information. There will be an AI powered chatbot which the admins can use to quickly access relevant data, check grammar, and automatically make changes to the document based on provided instructions.

AI-Powered Document Editor

Create compelling Statements of Purpose and Letters of Recommendation with AI assistance

Statement of Purpose

Document Editor

Write your Statement of Purpose here

I am passionate about artificial intelligence and machine learning, with a strong academic background in computer science. During my undergraduate studies at IIT Delhi, I maintained a GPA of 3.8/4.0 and conducted research on natural language processing.

My research experience includes working on sentiment analysis models and developing algorithms for text classification. I believe Stanford's MS in Computer Science program will provide me with the advanced knowledge and research opportunities to further my expertise in AI/ML.

After completing my degree, I aspire to work in leading tech companies or pursue a PhD to contribute to cutting-edge AI research.

N

ML Powered College prediction engine

We will first need to collect extensive data from past RBOE clients to train an ML model. Once trained, this model will get new student data (provided during onboarding) to create a list of dream, ambitious, moderate, and safe colleges from the available list of colleges

This tool can be helpful to rajiv sir, as it may suggest a lot of colleges, and rajiv sir can then look through the colleges to provide a preliminary shortlist

Onboarding Info

The student provides required information during onboarding, and receives a recommended list of colleges in 1-2 days.

Official Document Tracking

RBOE provides a checklist of documents (10th, 12th, college transcripts, GRE/TOEFL scores, etc.) , and the student has to track and tick off these documents. These documents will still be stored on the user's personal device.

Add Comment

Students shares preliminary SOP/LOR, admin provides updated SOP/LOR. The same LOR can be sent to every university. The provided SOP can be treated as a “master” SOP, and the student can create separate SOPs for each college.

This document editor can feature version tracking, as well as a comments section where admins and students can add comments. This eliminates the need for long email threads and request-response cycles

Student creates a college list and tracks the status of applications (pending/submitted/acc/rej). The admin can access this application list and provide help to students if required.

Calender

Student-specific calendar showing deadlines for their colleges, and suggested deadlines for applying for transcripts, sending GRE/TOEFL scores, applying for LORs, Visa, etc.

University Research

Student can access the admin-provided research info about each university, and they can also perform their own research and take notes. Each university will have an associated card, which will contain the application status, research report, application prompt responses, custom SOP, etc.

Additional Features

Additional Features

Various Static Resources

Pre-Application:

1. Document Lists
2. GRE/TOEFL guides with helpful resources
3. SOP/LOR writing guide
4. College researching guide, providing helpful website links
5. College Application guide

Post-Application:

1. Visa application Guide with required docs
2. DS-160 guide
3. Loan application guide with required docs
4. RA application, professor reachout guide
5. Flight booking (cheapest, best value, etc.)
6. Packing guide (what to take/not take)

After reaching:

1. Housing guide (how to look for housing, what factors to consider eg: distance from classrooms, nearby bus stops, grocery stores, etc)
2. US port of entry interview (rare but possible)
3. US living basic guide: Mobile phone, credit cards, insurance, SSN, State ID/ License, etc.

Visa Slot booking help

We could run a bot that constantly checks Telegram/whatsapp/reddit groups which provide updates about visa slot openings. Since the bot isn't checking the actual gov website, it will not get banned. There are already people who use bots on the govt website and send updates to telegram/whatsapp groups.

Admin Tasks

- Payroll
- Client payment tracking
- Client networking: incentivize client to refer new people using gift coupons, etc.
- Sponsorship and promotional opportunities (HDFC Credila, etc.)
